Press Release

FOR IMMEDIATE RELEASE

Engineering Economics, Inc. (EEI) Awarded Federal Energy Management Contract

GOLDEN, CO – Engineering Economics, Inc. (EEI), a national engineering consulting firm located in Golden, CO has been awarded a General Services Administration (GSA) Federal Schedule Contract for Energy Management Services.

This five-year contract allows the U.S. Federal Government and its related agencies to hire EEI directly for various energy management, energy conservation, building commissioning, retro-commissioning, and Leadership in Energy & Environmental Design (LEED[®]) projects. This puts EEI in a position to partner with numerous Federal agencies in the implementation of the energy conservation and energy efficiency projects anticipated from the American Recovery and Reinvestment Act of 2009.

As a GSA Federal Schedule Contract Holder, EEI has been vetted by GSA and approved as a prequalified vendor of Energy Management Services. With GSA-negotiated contract rates already in place, government procurement officials can now hire the firm through *GSA Advantage!*, bypassing the complex and time-consuming standard procurement process.

According to EEI's Branch Manager, Jarrell Wenger, "Our new contractual arrangement with GSA will simplify the procurement process for our Federal clients, allowing our team to go to work quickly in identifying, implementing and realizing energy savings for our customers."

EEI is a national engineering consulting firm, specializing in energy management, energy conservation, building commissioning, retro-commissioning, facility assessments and LEED services. EEI is an Energy Star Partner and currently has 62 employees in 12 offices strategically located throughout the United States to better serve our clients. The firm is pleased to be a service partner to Fortune 500 and nationally recognized organizations such as Pfizer, Boeing, Amazon, Capital One, Amgen, MD Anderson Cancer Research and numerous university and hospital systems across the United States.

More information on EEI and its projects can be found on the firm's website at www.eeiengineers.com.
